

JORDAN NWABUIKE

Address; Fajara M-Section, KMC, The Gambia | **Contact;** +220-7103716, +220-5176584

Email; jordannwabuike@gmail.com | **My LinkedIn;** www.linkedin.com/in/jordan-c-nwabuike

GitHub Repository: <https://github.com/Jordanlopez546>

My Portfolio Website: <https://jordanlopez546.github.io/Jordan/>

Objective:

I am an Experienced Software Developer and a Tech Enthusiast.

Projects:

1. Shielded Hub (Personal Project)

- I built a secure password manager app for mobile and web platforms, enabling users to store and manage credentials with robust encryption. The mobile version is built with TypeScript and React Native, the web version is built with Next.js, whilst the backend is powered by Node.js, Express.js and MongoDB. Explore the web version at <https://shielded-hub-web.vercel.app/>

2. Student Portal (Personal Project)

- I developed a Student Portal web App using HTML, CSS, Bootstrap, Python and Django. The web app allows students to easily register for courses from a list of options. I also added search functionality to make it convenient for students to find courses. Additionally, I implemented student authentication and authorization features.

Experience:

Insist Global Ltd. The Gambia (Software Engineer Intern)

- Collaborated on Next.js and TypeScript with other senior software engineers in real world projects. Worked on some parts of the admin dashboard of the Afrijula app. Followed the SDLC principles thereby crafting a web weather app using Next.js and TypeScript.

My Technical Skills:

- **Programming Languages;** Python, Java, JavaScript, TypeScript
- **Web/Mobile;** HTML, CSS, Next.js, Django, React Native, Nodejs & Express.js, MongoDB
- **Version Control;** Git, GitHub

Education:

- Bachelor of Science in Computer Science (Expected Graduation: 2026)
University of The Gambia, Faraba Banta, The Gambia.
Relevant Coursework: Data Structures & Algorithms, Web Development, Database Systems
